

# Case Study – RFID Asset Management

## Managing high value manufacturing and IT Assets with UHF RFID

A large pharmaceutical manufacturer required a flexible, user friendly barcode and RFID asset management system.

Besides managing over 6,000 assets, the solution offered needed to offer both barcode and UHF RFID capability as well as fixed UHF RFID tracking for laptop management across 4 key entrances and exits. In additions, the solution needed to provide interfacing capability with the clients existing ERP system – SAP.

### *Challenge:*

- No control of high value asset movement
- No scanning of assets and long audit process
- SAP interface required

### *Solution Implemented:*

- Hardcat Lite Asset Management Software
- Readers: Alien ALR-F800 fixed, ATID Hand held, VD67 Desktop reader, Times-7 A5060 Antenna
- RFID tags: Xerafy Nano XII, RTEC Mini, (metal assets), Alien ALN-9662 labels (other assets), Toby tag (Laptops)

### *Benefits:*

- Laptop tracking ensures no unauthorised removals
- Improved asset management accuracy and reduced time to audit
- Increased asset visibility
